

RP700 One Way Locking Double Pulley

One way locking bearings are ideal for lifting & lowering applications. The wheel locks in one direction to provide maximum friction, which allows for greater control while lowering. When operated in the opposite direction, the wheel is free-running to reduce friction to a minimum, for greater ease of use when lifting.

Product Code:	RP700
Conformance:	EN 12278 EN 567
Rope Size:	10-13mm (3/8"-1/2")
Weight:	649g
WLL:	600kg
MBS:	30kN
Material:	Anodised Aluminium
