

RP705 Capture Pulley

One-way locking bearings are ideal for use in lifting and lowering applications. The wheels are locked in one direction, to provide maximum frictions, for use when lowering. In the opposite direction the wheels run freely, to minimise friction when lifting/hauling.

Product Code:	RP705
Conformance:	EN567
Rope Size:	10-13mm (3/8"-1/2")
Weight:	900g
WLL:	600kg
MBS:	30kN
Weight:	904g
Material:	Anodised Aluminium
