

RP880 Descender

The D4 work/rescue descender features a unique and innovative cam action, which offers precise control at slow or fast speeds.

The progressive cam works by way of one cam operating inside another cam.

The D4 has a 240kg (530lbs) Working load limit which means it is suitable for two-man rescue, without the need for the creation of extra friction.

The handle mechanism is designed to rotate through 360° making its use easier and simpler. The handle itself is made from aluminium rather than plastic and is coated in a specially chosen paint which provides extra grip. Cleverly, the handle rotation is accompanied by audible clicks which help the user identify the correct position of the handle.

Product Code:	RP880
Conformance:	EN12841, ANSI Z359, NFPA 1983 - meets the requirements of EN341
Rope Size:	10.5-11.5mm (7/16")
WLL:	240kg
Width:	65mm
Cam Material:	Stainless Steel
