

SLIXHALV SLIX Half Stretcher

Product Description

Engineered for the most challenging environments, the SLIXHALV Half Stretcher is your go-to solution for rapid patient placement and safe transport. Whether swiftly deploying in emergency situations, navigating through tight spaces in search and rescue operations, or optimizing patient transfers within medical facilities, this stretcher is built to adapt and excel.

Key Features:

- 'Arms Out' Design:
To navigate tight spaces where the casualty may be required to articulate limbs..
- Head Pocket and Groin Straps:
Minimizes movement, reducing injury risk.
- Versatile Use:
Ideal for narrow spaces and open terrains alike.
- Low Friction Skin:
The stretcher's skin boasts a lowfriction surface that prevents ruckling or snagging, allowing for smooth movement during dragging and transport.
- Reinforced Head End Eyelet:
For secure drag-rope attachment.

Safety Precautions:

Training and regular maintenance is recommended for optimal performance.

Technical Specifications:

Dimensions (L x W): 105cm x 88cm (laid flat)
Weight: 5kg
Material: LDPE
Load Capacity: 140KG

The SLIXHALV isn't just a stretcher—it's a multi-functional asset that prioritises patient safety while elevating operational efficiency.
