

UH238 Harness

Yoke harness designed for use on wood poles and transmission towers. Heavy wearing polyester webbing for enhanced durability, sliding side D rings and ergonomic waist pad for added comfort and durability.

Fully openable to allow easy donning and doffing, it is designed to be comfortable to wear all day and not restrict movement while moving or climbing.

It features an ergonomic waist pad to help prevent lower back discomfort, wide mesh leg pads for comfort in suspension, sliding D rings to allow movement while attached in work position and an additional quick release buckle on waist belt for easy use.
